

How to use the Race Across the West Route Book

The nine hundred thirty mile route designed for the 2019 Race Across the West is divided into 15 sections with a designated Time Station at either end. Sections average about 70 miles (100 km) in length with one in Arizona approaching Flagstaff over 100 miles long. Time Stations are defined as specific locations, frequently highway intersections, at which the racers' times are reported to race headquarters by the Crew. Some of the Time Stations are staffed by volunteers there to provide information, help and other services appropriate to the location. They may be set up anywhere within visual range of the timing location designated in the Route Book where they can best provide their services, usually close to the timing point and on the right side shoulder or curb of the route highway.

With the exception of special pages covering start procedures each route section is specified in detail on two facing pages of the Route Book. On the left hand page is a topographic map of that section with detailed inserts to clarify places where several turns occur close together or where other amplification is considered useful. Below the map is an elevation profile of the route in that section. Be careful to note the vertical elevation and horizontal terrain mileage scales of these charts as each is adjusted to fill the same space on the page. Distances are in US statute miles following the route terrain similar to measuring with a precision odometer and elevations are in feet above the WGS 84 datum sea level.

The right hand page contains the specific instructions for following that section of the route in tabular format. Column headings are: **ref**, **mile**, **turn**, (description), and **elevation** and are explained in the following paragraphs.

ref A **reference** designation assigned in sequence to each line in the instructions which specifies action at that particular location.

- Time Station **ref** designations are TS01 through TS15.
- “Turns” have **references** starting with two digits for the number of the next Time Station ahead followed by a letter which allows you to put all the turns in a section in proper sequential order. After this is a hyphen (dash) followed by a one or two letter abbreviation indicating what the Route Book directs you to do at this location. There aren't many choices: an L or an R suggests a left or right turn of about 90 degrees or more whilst BL and BR refer to turns which are less than 90 degrees (bear left and bear right). An S means to go straight and is seldom used except when the road you are on turns but the intent is for you to continue in a more or less straight direction onto the connecting road, or some other unusual situation.
- These **ref** designations are useful cross **references** between the Route Book and points displayed by a GPS receiver on a bike or in a vehicle or shown on the screen of a computer running mapping software. In addition the **ref** designation is also handy in communications, both with your Crew and with Race Headquarters. “We are three miles before 6F.” immediately conveys a complete Route Book **reference** without worrying about page numbers or location names. Similarly should a racer be proceeding alone and carrying a handheld GPS receiver to count down the distance to the next turn, the name (**ref**) of the turn, if the gadget can display it, tells him in simplest terms what to do when he gets there. You will probably find other uses for the convenient **reference** label in coordinating racer support.

mile Every instruction in the Route Book refers to a location along the route. The mile number is the odometer or terrain distance along the route since the previous Time Station.

- For this number to be most useful the driver must remember to rezero the trip odometer of his vehicle at each Time Station and then realize that if the vehicle has to depart from the specified route (stop for gas or whatever) the odometer may no longer correspond to the miles indicated in the Route Book.
- For convenience, those miles which correspond to **referenced** turns or other action are in **boldface (dark) print**. It is recommended that crews also use colored highlighter pens to further emphasize these points. Missing a turn can ruin your whole day by immensely annoying the cyclist.

- If two lines of instruction refer to points less than .1 mile apart the second will normally have “**Imm**” for “immediate” in the mile column or perhaps “1 blk” for one city block (the distance to the next intersection).

turn This column contains the spelled out **LEFT**, **RIGHT**, **br LEFT**, **br RIGHT**, and **straight** instructions abbreviated in the **ref** key and they are also in **dark print**. “**br**” means “bear” or “veer.”

- The first entry in each section uses a compass heading to indicate in which direction you should go when leaving a Time Station and will most often be “**East**” or “**Northeast**” but not always. Time Stations which are set at intersections can be confusing so this indication is there to help in addition to the comments in the directions column.
- All other entries in the turn column are in faded (light) printing and are the miles remaining until the next turn. To emphasize that no action is to be taken the word “straight” may appear in light print in the turn column without resetting the countdown to the next turn. This may happen when there is an intersection at which the route appears, through differences in paving or traffic, to turn but in fact does not.

elevation This is the surveyed altitude above sea level of the point and is provided to help anticipate climbs and descents.

- Every **referenced** turn has a listed elevation as do other points which mark the start and top of significant climbs even if the location itself, often a creek, has no road sign or other means of identification.
- This number will not often agree with GPS data within 30 feet due to the inherent variability of satellite locations and their orbital geometry but the difference between numbers in the elevation column of the Route Book represents the real world as it is in published topographical data.
- You are cautioned against using the elevation number together with whatever the GPS unit displays all by themselves to determine where you are along the route.

(description) The main column on the right hand page contains the amplifying information for turns, the names of streets at highway junctions, and the like. Also suggested lane changes for turns ahead may be included but need not be strictly followed. As long as you stay on the specified route, whatever lane or shoulder, you are riding according to RAW rules but you must also realize that local police and traffic controls, even if temporary, by rule take precedence over the Route Book and any conflict must be reported to headquarters.

Sometimes additional information is included in italics to help crews avoid getting off the route or where traffic or other hazards are expected. However it is important to remember that no roads have been closed nor normal traffic flow diverted for the passage of RAW racers and vehicles and that permanent or temporary “road furniture” may be anywhere.

There are few abbreviations like “Jct” for a road junction, intersection, or interchange and those associated with street names like Rd, St, Ave and the like. When associated with a highway “Bus” refers to the business route, not public transportation.

In the US a “roundabout” is normally referred to as a “traffic circle” or “rotary” and additional information may be provided where one is found at a route turn since a route LEFT turn may be accomplished by a right turn into the circle and another right turn to exit from it after going about three quarters of the way around.

A US highway is indicated by its numerical route number such as US 56 E for US highway 56 going east. A state road would be referred to as SR 252 and so forth regardless of what state it is in. CR indicates a county road, IR an Indian reservation road. Many of the roads RAW follows have multiple national, state, and regional designations as well as a local town name. The most conspicuous will be listed together in the directions, e.g., “**US 37 E/SR 54 N/Main St**”.

On an instructions line the road which is part of the RAW route at that point is in **dark (boldface) print**.

Intersections where actions are required often have the following abbreviations to help you identify them:

- **TL** (traffic light)
- **yTL** (flashing yellow caution light)
- **rTL** (flashing red stop light)
- **T** (a three way “tee” intersection)
- **SS** (a stop sign in our direction)
- **4SS** (stop signs in every direction, “all stop”)

This information is seldom included for junctions where we take no special action but of course every traffic control sign, light or other device must be obeyed according to RAW rules as well as local laws.

Most railroad crossings are indicated by **(RR)** and by state and federal law must have warning signs. Livestock control grates (Cattle Guards) are sometimes real and sometimes just paint on pavement but only the real kind are listed using **(CG)**. Others, real or just paint, should be anticipated as surely as the animals they try to control or any other hazard in the road. Similar structures used to allow water in normally dry creek beds to cross the highway without flooding but are listed as **(CG)** regardless of their function. These are often temporary and are eventually replaced by culverts or other drainage measures.

There are many terrain features identified for which there will be no highway signs or other markings. Most of these are included either to mark the start of a climb (frequently a creek bed) or its end. A few other unmarked features which should be apparent to Racers and follow vehicles, such as bridges across small waterways, are included to help track progress.

At the bottom of each right hand page are spaces for recording the time of the racer’s arrival as reported to headquarters and the confirmation number received back from headquarters as evidence that the report was accepted.

It’s about time!

What time is it anyway? All involved in the race are encouraged to use RAAM race time which is Eastern Daylight Time, the local time at the finish in Annapolis (UTC -4). But RAAM night riding rules specify when crews must provide direct follow support to all racers on bikes based on the local clock time. This is usually simple to figure out but not in Arizona, the only state (besides Hawaii) where Daylight Time is not observed. This means that when going from Pacific (Daylight) Time in California to Mountain (Standard) Time in Arizona when crossing the Colorado River the local time does not change. That's simple enough but northeast of Flagstaff we enter the Navajo Indian Reservation and stay there all the way to Colorado, except for a few miles on the Hopi Reservation. Contrary to Arizona rules the Navajos observe the Daylight Time change with Utah and Colorado but the Hopi Indians, surrounded by the Navajo lands, do not. To clarify all this, between the Colorado River and the state of Colorado the route directions pages will specify where direct follow during daylight hours is required or prohibited.

Detours/Alternate Routes:

Between the start and the point in the desert where restrictions on support vehicle use of the route are lifted (Time Station 1) there are several routes provided. The one for the bicycle racers must be strictly followed and since crew support is not present the racers should each have the copy of the instructions for that part of the route, included in the Route Book as a tear out page, and know how to interpret them.

A suggested route for the follow vehicle to rendezvous with the racer is provided but need not be followed as long as no crew support vehicles are on the route for the first 23 miles which is almost 16 miles past the bike path parade end.

Special attention must be paid the restrictions on the size and number of support vehicles for solo and team racers

before Time Station 1 on the desert floor since use of the “glass elevator” rapid downgrade by large vehicles is prohibited in the race rules and experienced mountain cyclists may indeed be trying to go considerably faster than all motorized vehicles with no really safe opportunities for anyone to pass anyone else, other than perhaps two daredevils on bikes. A suggested alternate route is offered for RV’s and other vehicles not permitted on the course or to use the glass elevator to get from the race start to the rendezvous point on the desert floor. RV’s longer than 40 feet may not be able to use this or other suggested large vehicle bypass routes elsewhere in the Route Book.

Several other “alternate” routes on the way east are described to allow large vehicles to avoid prohibited use of narrow mountain roads in Arizona. Each of these is indicated in the remarks at the top of the associated instructions page with details in a box at the bottom of the same page

Time Stations:

Every effort has been made to locate time stations to meet the needs of the crews.

RAW has no business or other commercial relationship with Wal-Mart Stores, Inc., however where possible Time Stations are placed at this company’s always open (except on Christmas Day) large discount stores, called Supercenters. Of particular advantage to RAW crews are the large lighted parking lots, which welcome RV’s, plus the core merchandise and grocery products on offer at almost all locations which are consistent in quality, price, and, again to the particular benefit of a time pressed crew, store product placement. Walmart stores also maintain high standards of restroom cleanliness, of interest to those not traveling in motorhomes.

Second to Walmart as effective Time Station locations is the McDonald’s restaurants franchise chain which now offers their unfiltered and unsecured Wi-Fi hotspot internet access at most locations without cost or membership so that crews can keep up on race status and take care of email and web postings. Again, RAW has no business relationship with McDonald’s Corporation so our racers and crews are simply their customers.

At a few Time Station locations there may not be any of the amenities such as available at Walmart, McDonald’s, or a 24 hour gas station. Sometimes the Route Book directions offer suggestions to top off on fuel and provisions before embarking on a long section without 24 hour services at Time Stations along the way, but crews are advised to plan to be self-sufficient through every night regardless of where they are on the course.

Look ahead!

It is always prudent to plan ahead at least one Time Station and carefully look over the next page of instructions. Many times a Time Station has been placed at a turn in the route. That turn may appear on the page for that time station or at the start of the next page. Don’t make the mistake of letting your Racer proceed on his own during the day and possibly missing a turn while the follow vehicle places a cell phone call or stops to use the public facilities.

Route changes:

While there were no road closures found during the most recent route check which would prevent a racer and follow vehicle from safely following the route or an identified detour around the work area, always be ready to adapt to unexpected pavement conditions. If a road closure blocks the race route headquarters will provide instructions about how to proceed when the crew calls in to report arrival at a preceding time station. Only Race Headquarters, or a Race Official distributing instructions on behalf of HQ, can authorize a racer to depart from the route specified in this book without a penalty or risk of disqualification.

Start to TS 1, part 1

Parade and Unsupported Race zones.

[Section 13 of the Rules]

Specific routing for the parade zone below may be modified/superseded by "Special Instructions - Start 2019" elsewhere in this book or as directed by Race Management, Officials, and Directors at the start line ceremonies.

PARADE ZONE

<u>mile</u>	<u>turn</u>	
0.0	North	The Strand. <i>Distances measured from the Pier.</i>
0.4	RIGHT	SS: Surfrider Wy.
0.4	LEFT	4SS: Cleveland St. <i>Racers turn left here, follow vehicles continue straight.</i>
0.5	LEFT	Neptune Wy. Follow north side sidewalk to San Luis Rey bike path.
2.9	br LEFT	First of four bike underpasses. Curve under each cross street.
7.8	br LEFT	San Luis Rey Trail access just before fourth underpass. <i>Teams: Only one Racer for each Team is required past this point. Others may bear right to exit the trail.</i>
Imm	br RIGHT	Sharp curve immediately after fourth underpass.
Imm	RIGHT	College Blvd. <i>Caution--Pole Barrier at the end of the bike path.</i> End of the Parade Zone. <u>Begin racing.</u>

UNSUPPORTED RACE ZONE

<u>ref</u>	<u>mile</u>	<u>turn</u>	<u>elevation</u>
		Continue west on College Blvd bridge over the bike path and San Luis Rey R.

	5.2	23.7 Begin 20 mi perfectly straight section.	
	19.5	9.4 <u>Gladden</u> .	
	27.1	1.9 <u>Aguila</u> . You may be able to spot Eagle Eye Peak on right.	
06A-L	28.9	LEFT T: SR 71 N toward Prescott. (RR) <i>Do not continue straight toward Wickenburg.</i>	2193
	33.2	19.4 Yavapai county line.	
	43.8	8.8 Merritt Pass summit. Resume climbing after 1/2 mile descent.	2794
	46.4	6.3 Proceed under US 93. Yarnell Grade is visible in the distance.	
TS06	52.6	TS 6: <u>Congress</u> . Congress Grocery (on right) midtown.	3048

Do not pull off the road and stop/park over dry grass!

On June 28, 2013 19 firefighters from Prescott died trying to contain a brushfire started by lightning ten days after RAAM passed by near Yarnell nine miles ahead. In 2016 5000 acres were burned just before RAAM got to the same location - this time the fire had a human cause.

Arrival time/conf#: _____ / _____

Time Station 6: Congress, AZ

395.0 miles so far: 535.5 miles to go

Two major climbs take us out of the low desert. The Yarnell grade climbs 1800 feet in 7 miles. The second in the Prescott National Forests takes us to Iron Springs, 1100 feet in 6 miles. With more than 130 feet per mile this is the most difficult climbing west of Maryland. Really!

**No Direct Follow during Day Time hours in Arizona until 60 miles past Time Station 9. (Rule 1405.2)
Observe Support Vehicle restrictions (no RVs allowed) beginning at mile 21.5 (Turn 07B-L).**

ref	mile	turn	elevation

Arrival time/conf#: _____ / _____

Time Station 9: Flagstaff, AZ

602.8 miles so far: 327.7 miles to go

Race Across the West 2019

TS 9 to TS 10

Flagstaff, AZ to Tuba City, AZ

Don't leave Flagstaff without enough good drinking water to last 280 miles to TS 14 in Cortez, CO.

Dangerous traffic likely as you leave Flagstaff. High desert scenery: vegetation diminishes as the road drops and the brown, yellow, red, white, and gray colors of the cliffs dominate the views. Many elk warning signs early in this section. At about mile 42 the race enters the jurisdiction of the Navajo Nation and local clocks shift from Mountain Standard to Mountain Daylight Time. We will be the guests of various tribes almost all the way to the race finish in Durango, Colorado. Be respectful of their culture.

There is no Direct Follow during Day Time hours until mile 64.9. (Rule 1405.2)

<u>ref</u>	<u>mile</u>	<u>turn</u>	<u>elevation</u>
TS09	0.0	Northeast Continue on E Huntington Dr , right turn from Walmart parking areas.	6844
10A-L	0.5	LEFT TL: S 4th St	6876
10B-R	0.8	RIGHT TL: US 89/Route 66/I-40 Bus. Lots of highway names, lots of traffic.	6860
10C-S	2.2	straight TL: Follow US 89 N toward Page. <i>Do not take US 66 toward I-40 and I-17.</i>	6825
	4.6	60.3 Townsend/Winona Rd.	
	9.6	55.3 Black Bill Park at Firehouse Ln. Commence climb.	6708
	15.0	49.9 11,200 ft Rees Peak (west); Sunset Crater National Monument (east). Start descent.	7285
	26.4	38.5 Leave Coconino National Forest and enter the Wupatki National Monument.	
	29.4	35.5 Leave the Wupatki National Monument.	
	41.2	23.8 Black Mesa Pump Station Rd. Rate of descent increases.	
	42.1	22.9 Enter the Navajo Indian Reservation. Mountain Daylight Saving Time = RAW race time - 2	
	44.5	20.5 Jct old US 89. Short break from the descent.	
	49.2	straight Jct SR 64. Reservation trading posts. Continue on US 89 N toward Page.	
	51.0	14.0 <u>Cameron</u> . Historic Cameron Trading Post (on left). Cross the Little Colorado River.	4120
10D-R	64.9	RIGHT T: US 160 E "Navajo Trail" toward Tuba City. Cross Hamblin Wash. Begin a short climb.	4461

Begin MANDATORY Direct Follow at all times until the Utah/Colorado state line. (Rule 1405.2)

	66.9	8.1 Top of the mesa.	4699
	75.0	0.0 <u>Tuba City</u> . Jct US 160 and SR 264/IR 101.	
TS10	75.0	TS 10: Tuuvi Travel Center.	4823

Don't be confused by the clocks in Tuba City. Navajo tribal offices and schools observe Mountain Daylight Time (RAW time - 2 hours), while most businesses do not to conform with the Hopi Indian lands immediately to the southeast.

Arrival time/conf#: _____ / _____

Time Station 10: Tuba City, AZ

677.8 miles so far: 252.7 miles to go

Elk warning signs are replaced with "Flash Flood Area", "Cattle on Road", "Horses on Road" and "Blowing Dust" warning signs. We are still on the lands of the Navajo and Hopi people.

MANDATORY Direct Follow at all times until the Utah/Colorado state line. (Rule 1405.2)
